

The vendor measured a visit. The study measured a week.

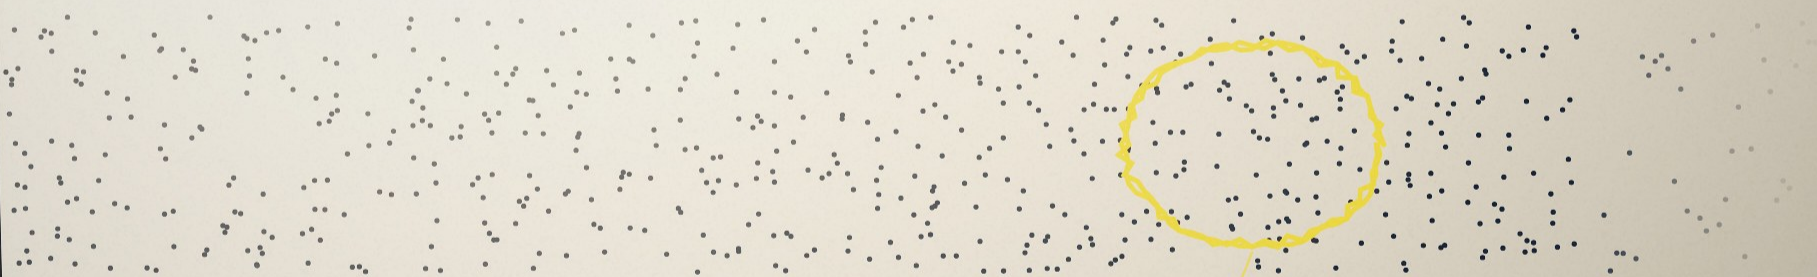

16 MIN / VISIT
CARBON HEALTH, SELF REPORTED

0.90 HR / WEEK
JAMA NETWORK OPEN, PEER REVIEWED

NEITHER IS WRONG. NOT THE SAME SCALE.

A clinic network that owned its own software.

Carbon Health ran ambient charting across every clinic from June 2023. More than 600 clinicians. The company built it inside an EHR it owned itself, which is the detail that decides whether this story is yours.

600 PLUS CLINICIANS

ONE PILOT CLINIC

MEASURED BY	CARBON HEALTH, ITSELF
INSTRUMENT	COMPANY BLOG, JUNE 2023
POPULATION	ITS 600 PLUS CLINICIANS
UNIT	MINUTES PER VISIT

The note gets written after the visit is over.

16 MIN, MANUAL 1 MIN = 44 PX

UNDER 4 MIN, DRAFTED

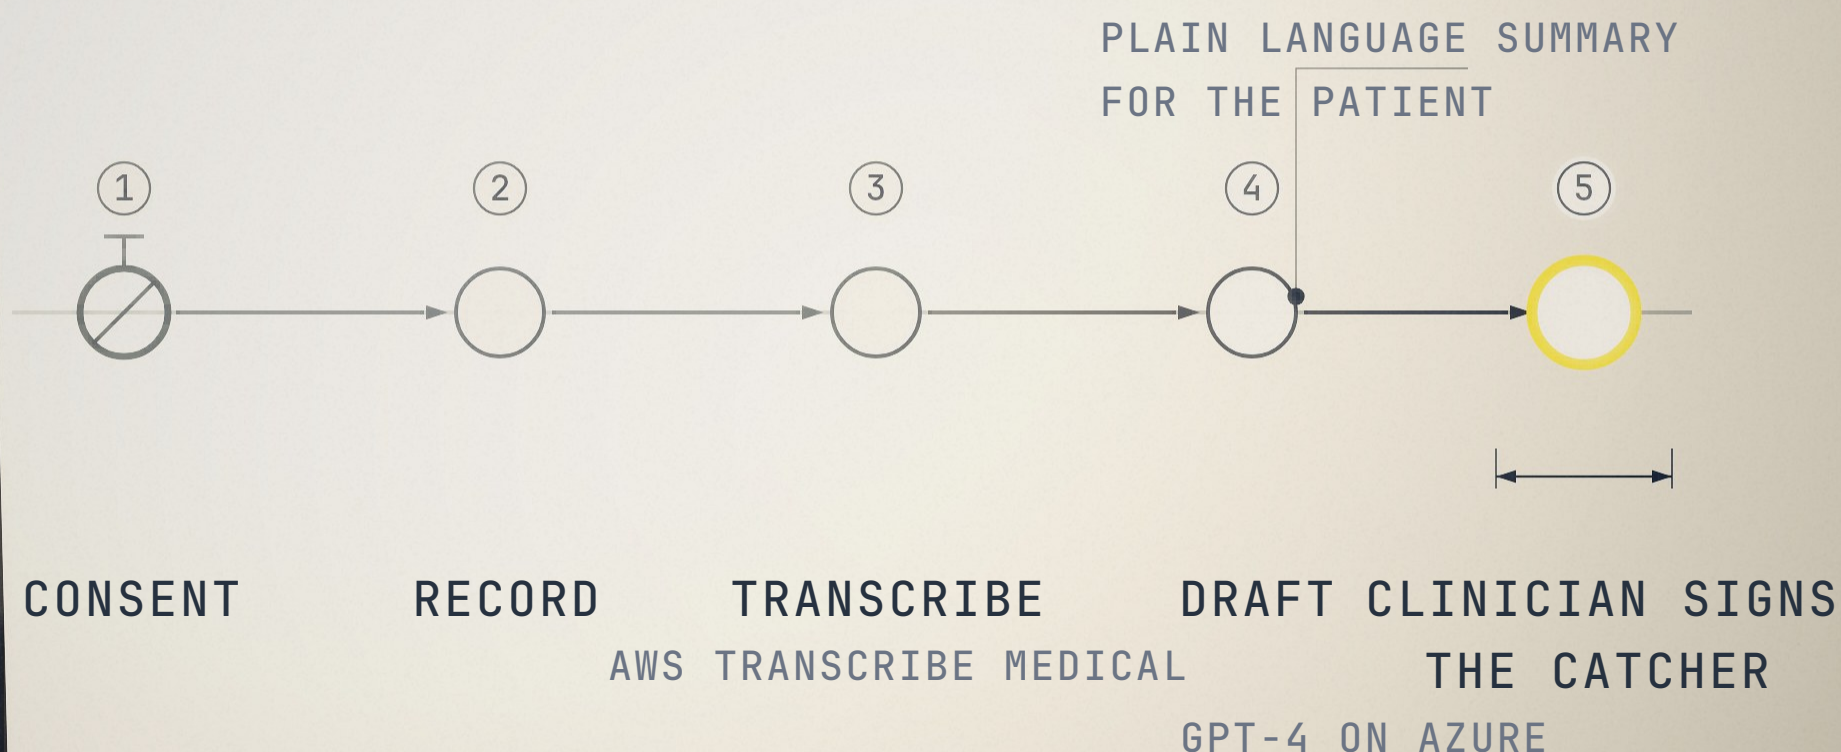

DIFFERENCE, MORE THAN 12 MIN PER VISIT

A manual chart averaged 16 minutes. The company says its draft comes back in under 4. Both figures are Carbon Health measuring itself, on its own blog, with no method published and nobody outside checking.

PER VISIT

PER WEEK

Five steps, and a person at the end of them.

Consent, record, transcribe, draft,
and a clinician reads it and signs.
Nothing here plans its own steps. On
the ladder that is a workflow, not an
agent.

PER VISIT

PER WEEK

RUNG 4, WORKFLOW

Five figures. One source.

FIGURE	WHAT IT MEASURES	WHO SAYS SO
16 MIN TO UNDER 4	one chart, manual vs drafted	CARBON HEALTH, SELF REPORTED
88 PERCENT	AI text accepted without edits	CARBON HEALTH, SELF REPORTED
2.5 TIMES	chart detail, undefined	CARBON HEALTH, SELF REPORTED
600 PLUS	clinicians it reached	CARBON HEALTH, SELF REPORTED
10 DAYS	the rollout, not the build	CARBON HEALTH, SELF REPORTED

PER VISIT

PER WEEK

NOBODY OUTSIDE CHECKED THESE.
NEXT, WHAT OUTSIDERS MEASURED.

MEASURED BY	CARBON HEALTH, ITSELF
INSTRUMENT	COMPANY BLOG, JUNE 2023
POPULATION	ITS 600 PLUS CLINICIANS
UNIT	MINUTES PER VISIT

Someone outside measured. A different product.

BURNOUT, 51.9 TO 38.8 PERCENT, EXPLORATORY

MAGNIFIED 30 TIMES

WHISKER, PLUS OR MINUS ONE SE

DIFFERENT TIME BASES. DIFFERENT PRODUCTS. NOT A SUM.

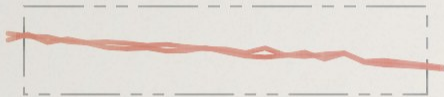

THE SAME FINDING, RESTATED PER DAY, 10.8 MINUTES

PER VISIT × PER WEEK

NOT THE SAME BASE

Three claims worth a second look.

30 PERCENT MORE PATIENTS

NOT CHECKED

In the company's own press release, from one pilot clinic, with no control group. Their engineering blog never repeats it.

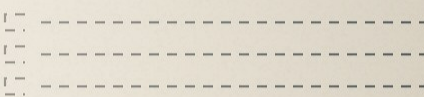

88 PERCENT ACCEPTED

CARBON HEALTH, SELF REPORTED

Accepted without edits is not checked for accuracy. The page names no external standard.

THE STUDY ITSELF

JAMA NETWORK OPEN, PEER REVIEWED

No control group. Self reported time, not EHR data. The authors say recruitment may have favored people who like new tools.

SO PLAN AGAINST THE WEEK

PER VISIT

PER WEEK

Alaska is not short of doctors.

ALL PHYSICIANS, ALASKA 240, US 248, PER 100,000

URBAN 300.4, ISOLATED SMALL RURAL 85.9

7 OF 29 BOROUGHES,
NO PRACTICING
PHYSICIANS, 2021

MEAN AGE 52. RETENTION, NOT RECRUITMENT.

Independent primary care and urgent care clinics are the twin here. Alaska ran 240 physicians per 100,000 against 248 nationally, and 95 primary care against 94. Its own report calls that similar. Seven of 29 boroughs had no practicing physician, and a scribe does nothing where nobody is.

CLINICS HERE BUY THIS. THEY DO NOT BUILD IT.

PLAN AGAINST THE STUDY'S 54 MINUTES A WEEK

UW CENTER FOR HEALTH WORKFORCE STUDIES, 2021 DATA

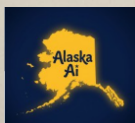

Measure your own week first.

PER WEEK

54 MINUTES, THE ONLY INDEPENDENTLY MEASURED SAVING

We do this kind of analysis for Alaska businesses, free. If you want your operation looked at this way, say the word.
